- Shared services: DPAR

Tech Contributions

- GitFlow & version control standardization
- CI/CD pipeline (Azure DevOps), NuGet automation
- .NET Framework migration to .NET 6
- Docker-based infra setup
- Agent server setup & automation
- Nuxt frontend infra setup
- Internal KM and ticket culture promotion

Summary / Self-Intro

I am an outgoing and optimistic individual with strong cross-team communication and collaboration skills. I value both efficiency and quality in delivery, constantly seeking to improve technical skills.

Previously worked in consulting on government investment applications, where I developed strong attention to detail and responsibility. Transitioned into tech through self-learning (LeetCode, online courses), landing my first dev job within two months.

At Creatidea, I built a solid tech foundation and improved internal documentation and processes. Later, at SYSTEX (onsite), I participated in large-scale, collaborative enterprise development.

Now at ITSOWER, I focus on infrastructure, dev workflows, and internal platform improvement, while gaining domain knowledge and hands-on experience in secure, high-throughput financial systems.

Open Source Projects

- [DbTool - SQL spec/document export tool](#)
